Subject: Interest in Obtain a Strain

Dear Dr. Judit Tornai-Lehoczki:

I am looking to obtain a bacterial strain of the genus *Propionibacterium* that has the following strain designation and accession No:

Propionibacterium Hh-GYOKI-1-123Sz Accession No. NCAIM B (P) 000287

I am being required to perform genetic analysis of this strain to determine if this strain is similar to a strain I have in my culture collection and have submitted a US patent for. How do we go about obtaining this strain from your collection?

I am looking forward to your response.

Sincerely,

Thomas Rehberger, Ph.D.
